Suspension light
Phoenix white, LED

Highlights

Four light recipes

Get the best light for whatever you do. Philips Hue has captured the optimal light for your daily activities in four light recipes. "Energise" bathes you in cool and vibrant light for that extra boost. "Concentrate" enables you to focus and get your work done with finely tuned bright white light. "Read" gives the optimal warm white light that does not strain your eyes — perfect for that good read. "Relax" helps you to unwind with a soft glow of warm white light.

All shades of white light

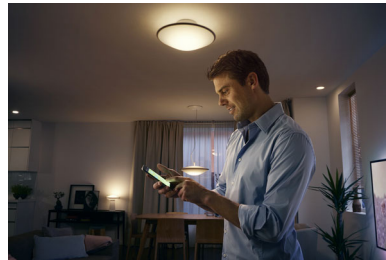

Set the right ambience for any moment with a range of beautiful, natural white LED light. Use the app on your smart device to set any shade of white light, from cool energising daylight (6500 K) to relaxing warm white light (2200 K).

Double the Hue experience

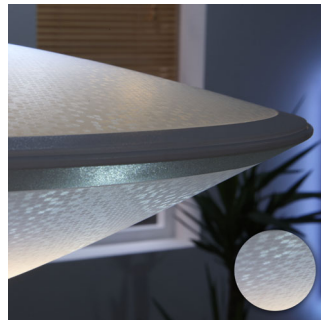

This Philips Hue light has two integrated independent light sources, so you can mix warm and cool white light to match your moment and set functional lighting for your activity at the same time.

Smooth wireless dimming

Adjust the brightness of your Philips Hue lights easily and seamlessly via your smart device. No need to rewire your home or install a wall dimmer.

3D texture for sparkling light

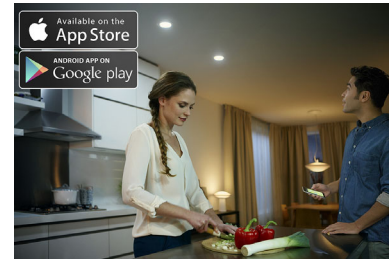

Hue Phoenix has a 3D texture that provides an enhanced appearance and a pleasant diffusion of light. The surface of the lamp is covered with

3115231PH

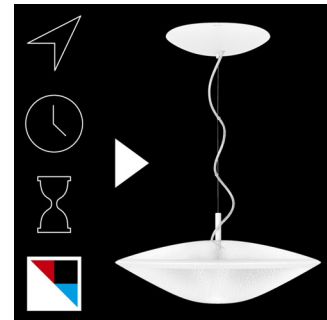

a hexagonal pattern that captures and reflects light, creating a sparkling effect. The effect changes depending on your viewing angle, making Hue Phoenix a dynamic and eye-catching decorative piece in your home, even when the lights are off.

Control from your smart device

Connect this Philips Hue lamp with the Hue bridge and discover the full range of lighting possibilities. Control the Hue lamp wirelessly from any iOS or Android device via the Philips Hue app or any third-party app developed for Hue. Set timers, notifications, alarms, geofencing for soft security, and sync to your entertainment system for the full Hue experience.

Timers and light notifications

Set your Philips Hue lights to notify you of incoming calls, messages, social media updates, appointments, the weather and other relevant communications received through your smart device. Through the IFTTT platform, you can set different behaviours for your lighting. Hue's ambient light notifications are a pleasant way to keep you informed and connected.

Specifications
